Starter Vault

50 Luxury Reels · Full HD · Watermark-free

Thank you for your purchase.

All your reel files are in this Google Drive folder, organised by niche.

This guide shows you exactly how to use them to grow your page.

YOUR VAULT AT A GLANCE

Your Starter Vault contains 50 watermark-free luxury reels, organised into folders by niche:

Supercars	20 reels
Luxury Watches	15 reels
High-End Lifestyle	15 reels

HOW TO DOWNLOAD

- On phone: open the Drive folder, tap the three dots on any reel, then 'Download'. To grab a whole niche at once, use the Google Drive app and long-press the folder.
- On computer: select multiple files (Ctrl/Cmd+click), right-click, 'Download' — Drive zips them for you. Transfer to your phone via AirDrop, cable, or your own Drive.
- Save this folder to 'Starred' in Drive so you can always find it again.

THE 5-STEP POSTING ROUTINE

- 1. Pick one reel from the niche that fits your page's theme today. Don't post the same niche twice in a row — variety keeps the feed fresh.
- 2. Open Instagram, create a new Reel, and add the video from your camera roll.
- 3. Add trending audio: tap the music icon and pick a sound marked with the trending arrow. Keep the original video muted if the sound clashes.
- 4. Add a hook as on-screen text in the first 2 seconds — a short bold line that stops the scroll.
- 5. Write the caption: hook line first, one line of value or story, then a CTA ('Save this', 'Follow for daily luxury', 'Comment KEYS'). Add 3-5 niche hashtags, not 30.

WHEN AND HOW OFTEN

- Post 1-2 reels per day, every day. Consistency beats perfection — the algorithm rewards accounts that show up daily.
- Best windows (IST): 11 AM - 1 PM and 7 PM - 10 PM. Test both for two weeks and check Insights to find YOUR audience's peak.
- Spend the first 30 minutes after posting replying to every comment — early engagement tells Instagram to push the reel further.

DO

- Build ONE clear theme — a luxury page, a motivation page, a watches page. Pages with a clear identity grow far faster than mixed feeds.
- Batch your work: download 10 reels on Sunday, pick their audios and captions, and schedule your whole week in one sitting.
- Watch your Insights Weekly. Double down on the niche that gets the most reach on YOUR page.
- Combine reels with Stories: repost your own reel to your Story with a poll or question sticker for extra reach.

DON'T

- Don't reshare this Drive folder or PDF — access is licensed to you only, and shared links get revoked.
- Don't post 10 reels in one day then vanish for a week. The algorithm punishes inconsistency.
- Don't delete underperforming reels — some pick up reach days later.
- Don't buy followers or use engagement pods. They wreck your reach permanently.

Enjoy Your Vault
